## FAQ

Developed together with the original creators of Lash Filler, Inlei, the revolutionary lash lifting treatment is scientifically proven to penetrate and permanently thicken the natural lash hair by 24%!!

### **So what exactly is lash filler and HOW is it different from a regular LVL?**

Lash filler doesn't just lift and curl the lash. Inlei Lash Filler is a gentle, non-drying AND non-damaging treatment that influences the hair growth by improving hair structure from inside the hair matrix. This gives a long lasting lifting effect to natural lashes whilst also nourishing and thickening thin, damaged and weak eyelashes.

### **Who is the treatment for?**

Lash Filler treatment is the PERFECT alternative to eyelash extensions.

Perhaps your client has an allergy to products used during the lash extension treatment, Lash Filler would be a great alternative to offer them instead!

The lash filler treatment is also perfect for clients who's eyelashes:

- Grow straight or downwards - lash filler helps lift these lashes resulting in perfectly curled and thick lashes!
- Are disordered and criss-cross naturally - lash filler lifts the lash so lashes are all in one direction.
- Are dry and brittle - lash filler strengthens the lash by penetrating the lash matrix.
- Thin eyelashes - Lash filler improves the natural thickness of the lash by up to 24%!
- Long and rigid eyelashes - lash filler nourishes the natural lash to help them become more manageable and soft
- Clients who want to take a break from eyelash extensions - lash filler offers the perfect alternative!
